

Intro to Programming

This course introduces the core concepts of programming using **Java**. By the end of SD1, you should be comfortable reading and writing basic programs, understanding how data is stored and manipulated, and thinking logically about solving problems with code.

No experience required. Start from the top and work your way through.

Topics

1.0 Introduction to Programming Concepts

IPO model and basic programming logic

2.0 Java Environment and Syntax

JVM, JRE, JDK, and writing your first program

3.0 Data Types and Input/Output

Variables, arithmetic, and user input

4.0 Conditional Logic

if, if-else, switch, and Boolean logic

5.0 Loops and Iteration

for, while, do-while, break, and continue

Practice Exercises

Hands-on exercises for each topic
